Dear Matteo,
its is my pleasure to accept your revised manuscript for publication in ACP.
There are no further revisions required.
However, before you can proceed to publication you need to reply to the Notification to the editors from review file validation, as listed below:
Despite my numerous requests and screenshots asking the authors to correct the references in the AI reference report (5), they refuse to do so.
My requests:
Reference 28 [Mismatch]:
-Please remove the space in the DOI link https://doi.org/10.1140/epjp/s13360-021- 01411-1
Reference 63 [Mismatch]:
- Please remove the space in the DOI link https://doi.org/10.5194/acp-25-16215- 2025
Reference 67 [Mismatch]:
-Please replace the incorrect DOI 10.1111/j.1600-0889.2009.00412.x with the correct DOI 10.1111/j.1600-0889.2008.00412.x
The author last reply:" Regarding the points raised:
References 28, 63: the DOIs provided are correct. For example (ref 63), this is correct, if you click it, it works (it's an ACP article) https://acp.copernicus.org/articles/25/16215/2025/
References 67: that's true, DOI does not exist. But this is a journal problem. The DOI that the journal report is wrong. We can't do anything. Here the link of the paper: https://www.tandfonline.com/doi/abs/10.1111/j.1600-0889.2009.00412.x"
and
"We have double-checked the references and confirm the details provided in our previous message. Regarding Reference 28, the DOI is the same as in the manuscript: https://doi.org/10.1140/epjp/s13360-021-01411-1 Please note that while there is a space after the hyphen in your screenshot, in our paper there is no space. For reference 63 you can refer to this DOI: https://acp.copernicus.org/articles/25/16215/2025/ and again this is the same DOI that we wrote in the paper, ad it works."
Please implement these revisions. Once I have received the competed manuscript I will immediately proceed with final acceptance.
Best wishes
Andreas

Done. Thank you for the help in resolving these issues.
