

Dear Professor Tina Treude,

In this last version, colors in figure 2 were modified to comply with color blindness preparation rules.

Indeed, all data related to this paper are provided in the supplementary files. We took this opportunity to add clumped isotope analysis reports to the supplementary files. Figure axes and panel labels typesetting was corrected in all figures according to the figure guidelines, and call to figure panels were corrected accordingly in the text file.

With best regards,

Thomas Letulle and co-authors.
