Dear Prof. Stroeven,

Thank you for your remarks. We emphasised an aim and our hypothesis, which is our paper related to, and we added some citations. However, we are a little confused about the annotated version you are mentioning in your comment – the only annotated version we could find in the system was from prof. Golonka (RC2), and there are no annotations in the chapters 1 or 2 (except one about correct citation). Moreover, it is not clear to us what these are 'requests for smaller formatting throughout the manuscript (and figures).' – we would appreciate if you could explain this. However, we are now sending the revised version because we don't want to miss a deadline.

Best wishes,

Maciej Kania

Mateusz Szczęch
