

1. It seems that tables are included as figures #4, Supplemental Figure #5. If it is so, they must be re-labelled as tables and the references in the manuscript text must be adjusted accordingly.

Response: The figures are correctly labeled as figures in the text.

2. Please ensure that the colour schemes used in your maps and charts allow readers with colour vision deficiencies to correctly interpret your findings. Please check your figures using the Coblis – Color Blindness Simulator (<https://www.color-blindness.com/coblis-color-blindness-simulator/>) and revise the colour schemes accordingly.

Response: This has been completed.
