

Supplementary Material

A Flexible Algorithm for Network Design Based on Information Theory

Rona L. Thompson¹ and Ignacio Pizzo¹

¹NILU – Norsk Institutt for Luftforskning, Kjeller, Norway

Figure S1. $\Delta^{14}\text{CO}_2$ variations at each site in the ICOS network simulated hourly from 12:00 to 15:00 every day for one year (the x-axis is day of the year).

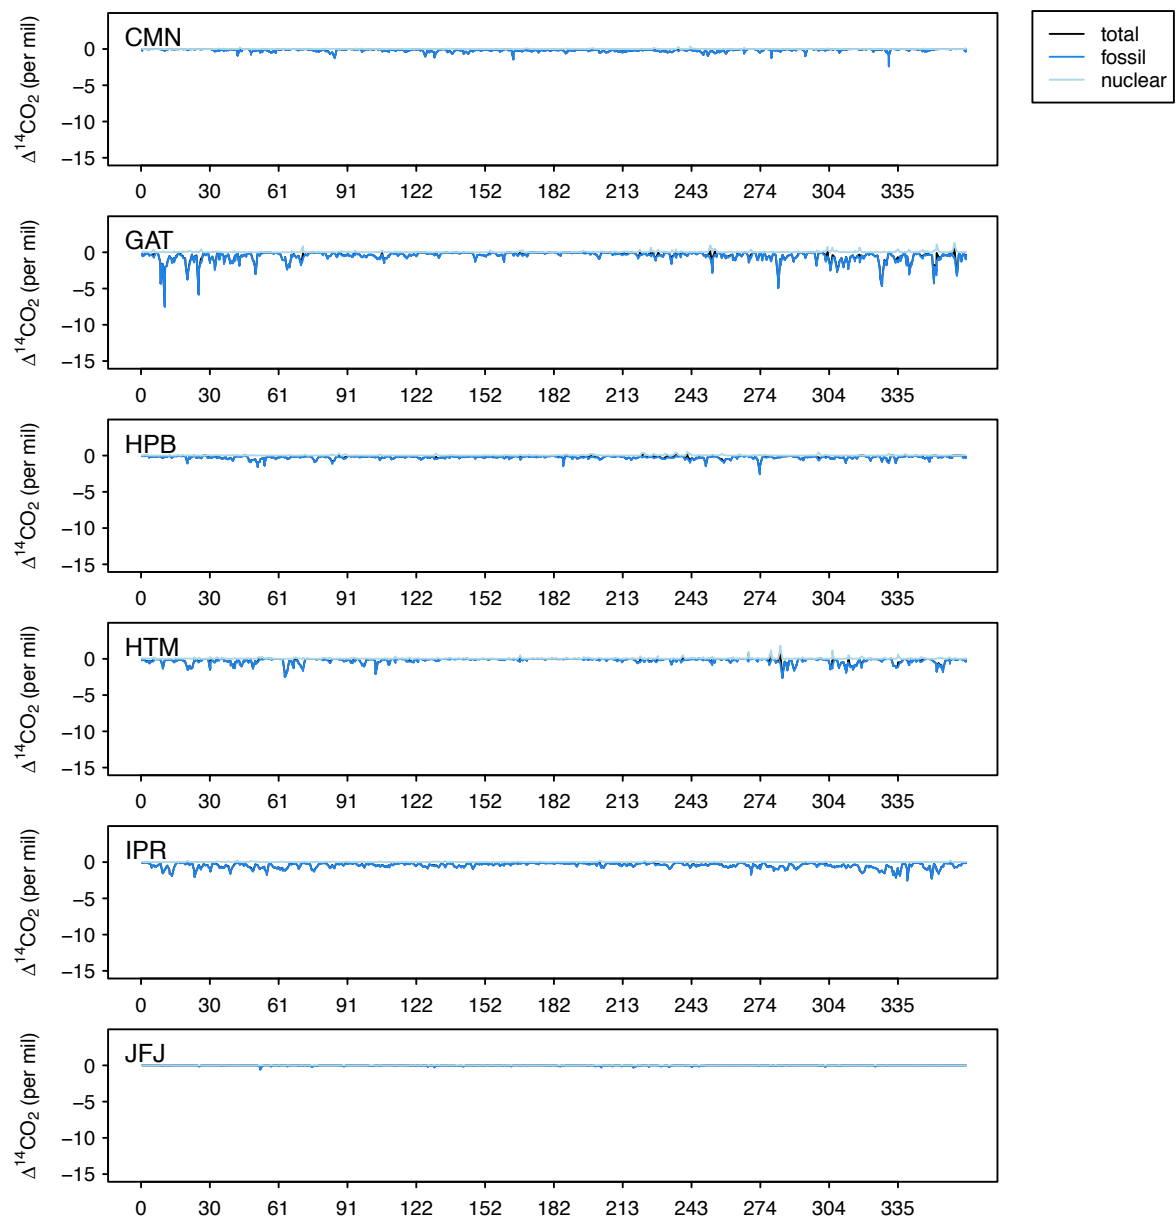

Figure S1: continued.
