Figure S1. left: mean PM$_{10}$ concentrations from the SRIM simulation; top right: mean difference in PM$_{10}$ concentrations between the HYGRO and SRIM simulations; bottom right: relative difference in mean PM$_{10}$ concentrations between the HYGRO and SRIM simulations. Note that PM$_{10}$ concentrations are nearly identical in the HYGRO and 1L2B simulations.
Figure S2. left: mean PM$_{10}$ AQHI values from the SRIM simulation; top right: mean difference in PM$_{10}$ AQHI values between the HYGRO and SRIM simulations; bottom right: relative difference in mean PM$_{10}$ AQHI values between the HYGRO and SRIM simulations. Note that PM$_{10}$ AQHI values are nearly identical in the HYGRO and 1L2B simulations.
