Re: Revised manuscript submission to *Geoscience Communication*

Dear John,

Please find attached the updated manuscript entitled “*GC Insights: Enhancing inclusive engagement with the geosciences through art-science collaborations*”. I have revised the manuscript and made the following minor revisions noted in a point-by-point response below, in relation to each comment.

Reviewer 1 Comments:

Just a minor suggestion: since the aim of your study is to evaluate two retrospective case-studies, it would be appropriate indicating the years in which the two art-science collaborations took place.

- We have added dates to each of the case study summaries.

Reviewer 2 Comments:

My suggestion would be to use a two panel Figure with sublabels to include both case studies in the manuscript, i.e. integrating both figures in the Supplement. I would also argue that the current Figure caption is beyond a simple description of what is shown in the Figure, hence if the additional text (e.g. quotes) are required these may perhaps be better integrated into the main text or supplement.

- We have updated the figure to include labelled panels of each case study image. We reduced the caption text to provide a simple description of each image, as requested.

Thank you again to the reviewers and for your guidance on this manuscript. It is much appreciated and thank you for the opportunity to submit our work for your consideration.

Sincerely,

Rosalie Wright
