

1) Table 1 - Please check dust scheme for CAMx. PSAT and OSAT are the apportionment methods and not the scheme, right?

→ Yes, this was a mistake, we changed it to “Calculation based on Ovadnevaite et al. (2014)” (p5)

2) I do not understand why totals of biogenic emissions can not be given. Even in the case they are calculated online information about the calculated emissions should be available from the model. Therefore, I suggest to put tables of the emission totals into the supplement.

→ We have included a table of the emission totals in the supplement Table S20
