

Egusphere-2022-499: DMS cycling in the Sea Surface Microlayer in the South West Pacific: 1.
Enrichment potential determined using a novel sampler

I am glad that we agree on the definition of repeatability and that this term has been amended throughout the manuscript.

However, I believe that the authors still haven't provided a source for the equation that they are using on line 146 of the revised manuscript.

This equation could be an alternative way of calculating repeatability, which I am not aware of, but if so, I would like to see a paper that uses this equation.

Here is a link to many publications in which repeatability is calculated and reported.
