

Dear editor Dr. McLean,

We would like to thank you for the suggestion regarding the weighted mean uncertainty of the ages. Following it, we have extended the discussion a bit and we added a new figure comparing both U-Pb and cyclostratigraphic ages. Likewise, we have made the letters in Figure 3 bigger as well as performed the little vocabulary changes you suggested. Thanks for helping us to improve the manuscript.

Sincerely,

Aratz Beranoaguirre (on behalf of the authors)
