

Reply to minor revision

Dear Dr Mausson

Thank you for your comments and request for a minor revision (in italics):

"Please check one more time that all DOIs and links in the Code & Data availability section are up-to-date. You can also remove the "Additional notes" section - it was not my intent to suggest malpractice on your part, but maybe you could have cited this previous contribution in the paper somehow."

We removed the "Additional notes" section, and cite the work in the introduction (line 80)

We checked the bibliography, and added DOIs to the references

Best regards

On behalf of all authors
Martin Schneebeli
