

Dear Prof. Chiel van Heerwaarden,

Tuesday 19th September 2023

Many thanks for accepting our publication, “The “Hydro-ABC model” (Vn 2.0): a simplified convective-scale model with moist dynamics” in Geoscientific Model Development.

No changes were requested for this version, but we have changed Fig. 6 as we found the original version to have failed colour-blind tests. Different shaped symbols are now used instead of different coloured symbols. The corresponding parts of the referring text have been changed accordingly.

Once again many thanks for considering our paper.

Yours sincerely,

Ross Bannister (on behalf of both authors)
