

We thank the editor for the review, and have made the suggested updates.

The revised version of the J-GAIN code repository on GitHub is now included as a frozen copy in the Zenodo repository (zenodo.org/record/8220223), as well as in the form of a new release in the GitHub repository (github.com/tolenius/J-GAIN/releases/tag/v1.1.0).

The revised version with the additional instructions and examples is now numbered v1.1, which we have updated in the manuscript title.
