

Scenario Choice Impacts Carbon Allocation Projection at Global Warming Levels - Authors response to Anonymous referee #1 – 2023-10-04

Hi,

Thanks to the referee and the editor for their on-going work with this manuscript. We appreciate you taking the time to review the paper again. The changes that you've suggested made have improved the manuscript. We went through the three specific comments and addressed them. Then we did a thorough readthrough for grammar, spelling, typesetting and consistency. While few changes were requested, many changes were made as can be seen in the track-changes file.

Kind regards,

Lee de Mora and the Authorship team.
