

Figure 1 is improved, but the labeling in the paragraph lines 69 - 84 does not accurately point to the parts of the figure. Line 74 - change Fig 1b to Fig 1(top) and line 75 change Figure 1a to Figure 1 (bottom). You also now label a 12th explosive event in Figure 1 (bottom) but refer in the text only to eleven events.

Line 158: You just defined the CAD to be between -100 and 100, but now state you are excluding points with CAD less than -100. How does that work?

Regarding discussion of Figure 5, you could just refer to the orbit number in Figure 5a, that is now clear enough.

Line 320: I meant the names were presented oddly. "Ghassan Taha" instead of "Taha Ghassan", etc. I had a comment before that incorrectly referred to Figure 1 when I meant Figure 2. The legend in Figure 2 has some obscure notation in it. "Himawari [FP]" What is [FP]? I infer this refers to author initials, but it's weird and not relevant to include here.
