Request for alteration of the Proofs

Dear Editor,

we apologise for asking to change the content of the tables 3 and 4 in the proofs of the paper

Modelling the effect of aerosol and greenhouse gas forcing on the South Asian and East Asian monsoons with an intermediate-complexity climate model

by Lucy G. Recchia and Valerio Lucarini.

Unfortunately, in the final submitted version after acceptance we forgot to update Tables 3 and 4. We included by mistake data that are correct but not entirely useful for supporting what is discussed in the text. The only change we have made in the last proofs revision is to subtract the reference climatology, because, anomalies are much better suited to present the linearity of the response. The amended Tables 3 and 4 are now perfectly aligned with Figures 12 and 13, respectively. This is definitely good for the readability and scientific quality of the paper.

We hope that this clarifies things and that you will approve such changes.

All the best,

Lucy G. Recchia and Valerio Lucarini
