

Dear Editor,

Thank you very much for your efforts in the article: egusphere-2023-1401.

Now the process is advanced to proofreading, and I find some mistakes that needed to be corrected.

- The reaction R3 at **section 1 Introduction** (line 21) was miswritten as:

And the **right** reactions of NO<sub>3</sub> photolysis are:

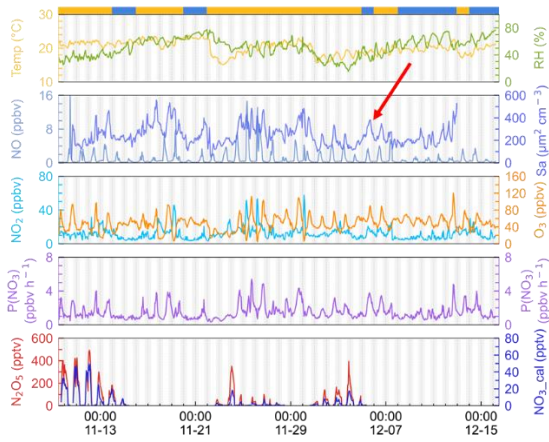

Please modify this part as following and where I make changes were showing in red:  
(Line 11, page 2 in the proofreading)

During daytime, the NO<sub>3</sub> mixing ratio is generally low as its lifetime is very short (< 5 s) due to the fast photolysis (Reactions R3 **and R4**) and rapid reaction with NO (Reaction **R5**) (a rate constant of  $2.6 \times 10^{-11} \text{ cm}^3 \text{ molec.}^{-1} \text{ s}^{-1}$  at 298 K, Atkinson et al., 2004). At night, NO<sub>3</sub> accumulates and can reach tens to hundreds of parts per trillion by volume (pptv), making it the major nocturnal oxidizing agent (Wang et al., 2015).

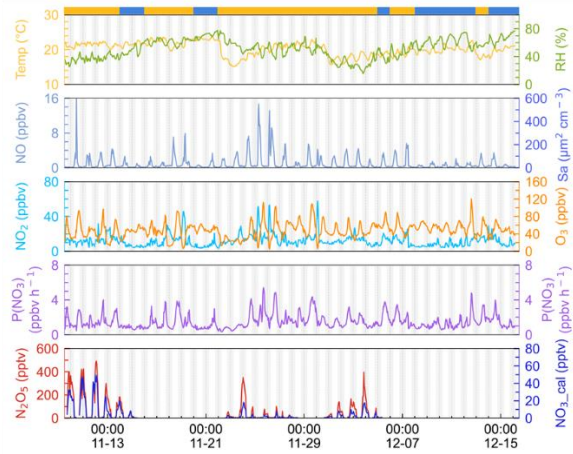

- In Figure 2, the image of **Sa ( $\mu\text{m}^2 \text{ cm}^{-3}$ )** (as pointed by the red arrow) was missing in the proofreading, and I provided the original version I submitted at the first time. There was no any change in content as well as form compared to the original except **displaying the image of Sa**. Please replace the Figure 2 in proofreading with the corrected version attached in the email.

The original figure

The figure in proofreading

Thank you very much in advance for your cooperation. I am looking forward to your reply.

Best regards,  
Jie Wang
