

Dear Editor,

Thank you for accepting our manuscript. We have made the final adjustments as per your recommendations: specifically, we increased the font size in Figures 8 and 3b for better readability. Additionally, we have moved the three supplementary figures previously referenced as "SI" to Appendix A, following the guidelines for appendices. In case there is a preference to submit the figures as supplementary information instead, please let us know.

We appreciate your guidance throughout this process and look forward to the publication of our work in WCD. Please let us know if there are any additional steps needed.

Best regards,

Dr. Julianna Carvalho Oliveira
