

Dear Editor

We have gone through the manuscript thoroughly, made the last changes, removed typos and updated the last figures. The uploaded version "proofread_manuscript" should now meet the journal standards and be ready for publication. Finally, we have also added a link to a data repository where the remote sensing data of the study can be accessed.

Thank you very much for your support and handling of our manuscript.

Yours sincerely

On behalf of all co-authors

Daniel Müller
