10 Supplement A - Literature review classifications

We did a topic search (TS) in the Web of Science for the period from 01.01.2004 to 01.04.2023 with the following terms TS=((“tipping point*” OR “tipping” OR “catastrophic bifurcation*” OR “catastrophic shift*” OR “regime shift*” OR “abrupt shift*” OR “critical transition*”) AND (“early-warning*” OR “early-warning*” OR “warning sign*” OR “resilience indicator*” OR “leading indicator*” OR 15 “precursor*”)). (<https://www.webofscience.com/wos/woscc/summary/5c5fcbb5b-76a0-4f0e-ae3a-742d406641e5-82c738be/relevance/1>).

We reclassified data-sources and early-warnings in the following ways:

20 Data-source

Survey = field survey, social study survey, monitoring data, historical climate data , weather station/instrumental data [Medical data = EEG, hospitalisation records, metabolomics, gene/ protein expression from human/animal tissue => survey of patient health]

Paleo-data = sediment cores, paleo reconstruction

25 Experiment_lab

Experiment_field

Social data= financial data, epidemiological data, social media data

Early-warnings

- 30 Autocorrelation = cross-correlation, correlation coefficient, network_correlation, correlation strength, autocorrelation at lag 1, autoregressive coefficient, autocorrelation at lag 1
Variance= variance CV, SD
Recovery rate = return rate, recovery rate
Power spectrum = spectral redness, low-to-high power spectrum, power spectrum density, spectral
35 density, density ratio power spectrum
Spatial variance = spatial covariance, spatial variance

List of the 65 reclassified early-warnings:

early-warning	# papers
variance	136
autocorrelation	119
skewness	38
power_spectrum	18
recovery_rate	16
spatial_correlation	16
spatial_variance	15
dynamic_network_biomarkers	13
kurtosis	13
