

Dear Prof. Von Hobe,

Thank you for your suggestion, and for accepting the paper. We have updated the manuscript and the supplementary, changing all the y-axis labels that used ppb/ppm/ppt from 'concentration' to 'mole fraction'. Additionally, for consistency, when we refer to concentration in the text and use ppb, we've changed that to mole fraction (this was only once in the main text, and three times in the supplementary).

Thank you again for your work as editor.

Best,
Lorrie and Alex
