

SUPPLEMENTARY MATERIALS

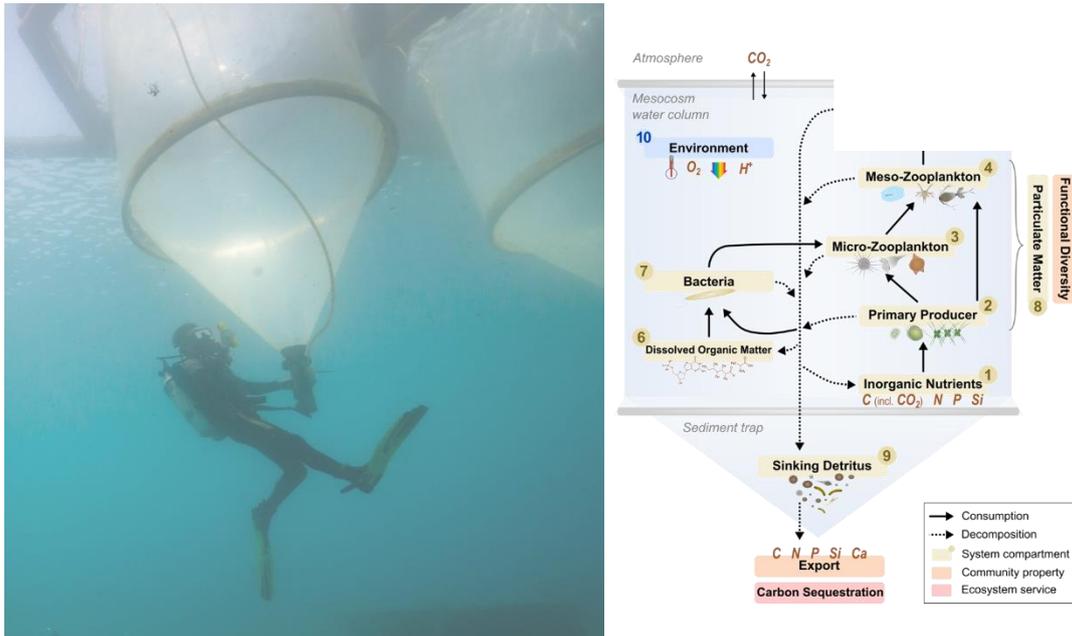

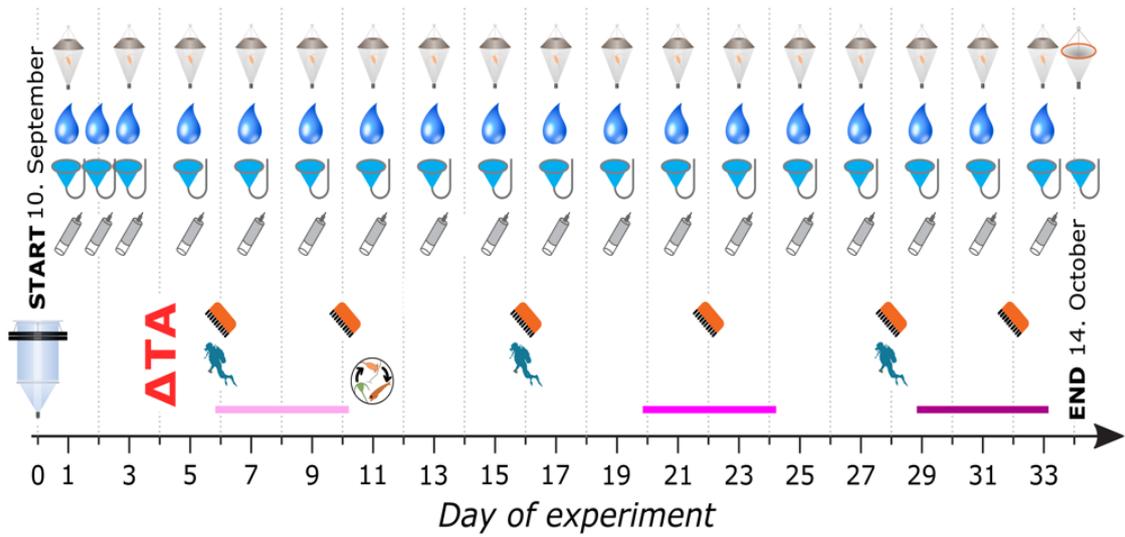

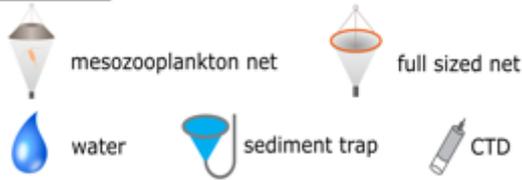

Figure S1. Picture and diagram of the mesocosms used in the current experiment. Left photograph by Dr. Michael Swatt and right diagram by Dr. Silvan Goldenberg.

Sampling:

Cleaning:

Other activities:

Figure S2. Activities conducted throughout the experimental period including, mesozooplankton and full-sized net casts, “water” meaning sampling for all parameters into the canisters or other parameter specific bottles, CTD casts, inside and outside cleaning of the mesocosm bags, ^{13}C spiking and side experiments. Figure proportioned by Dr. Silvan Goldenberg.

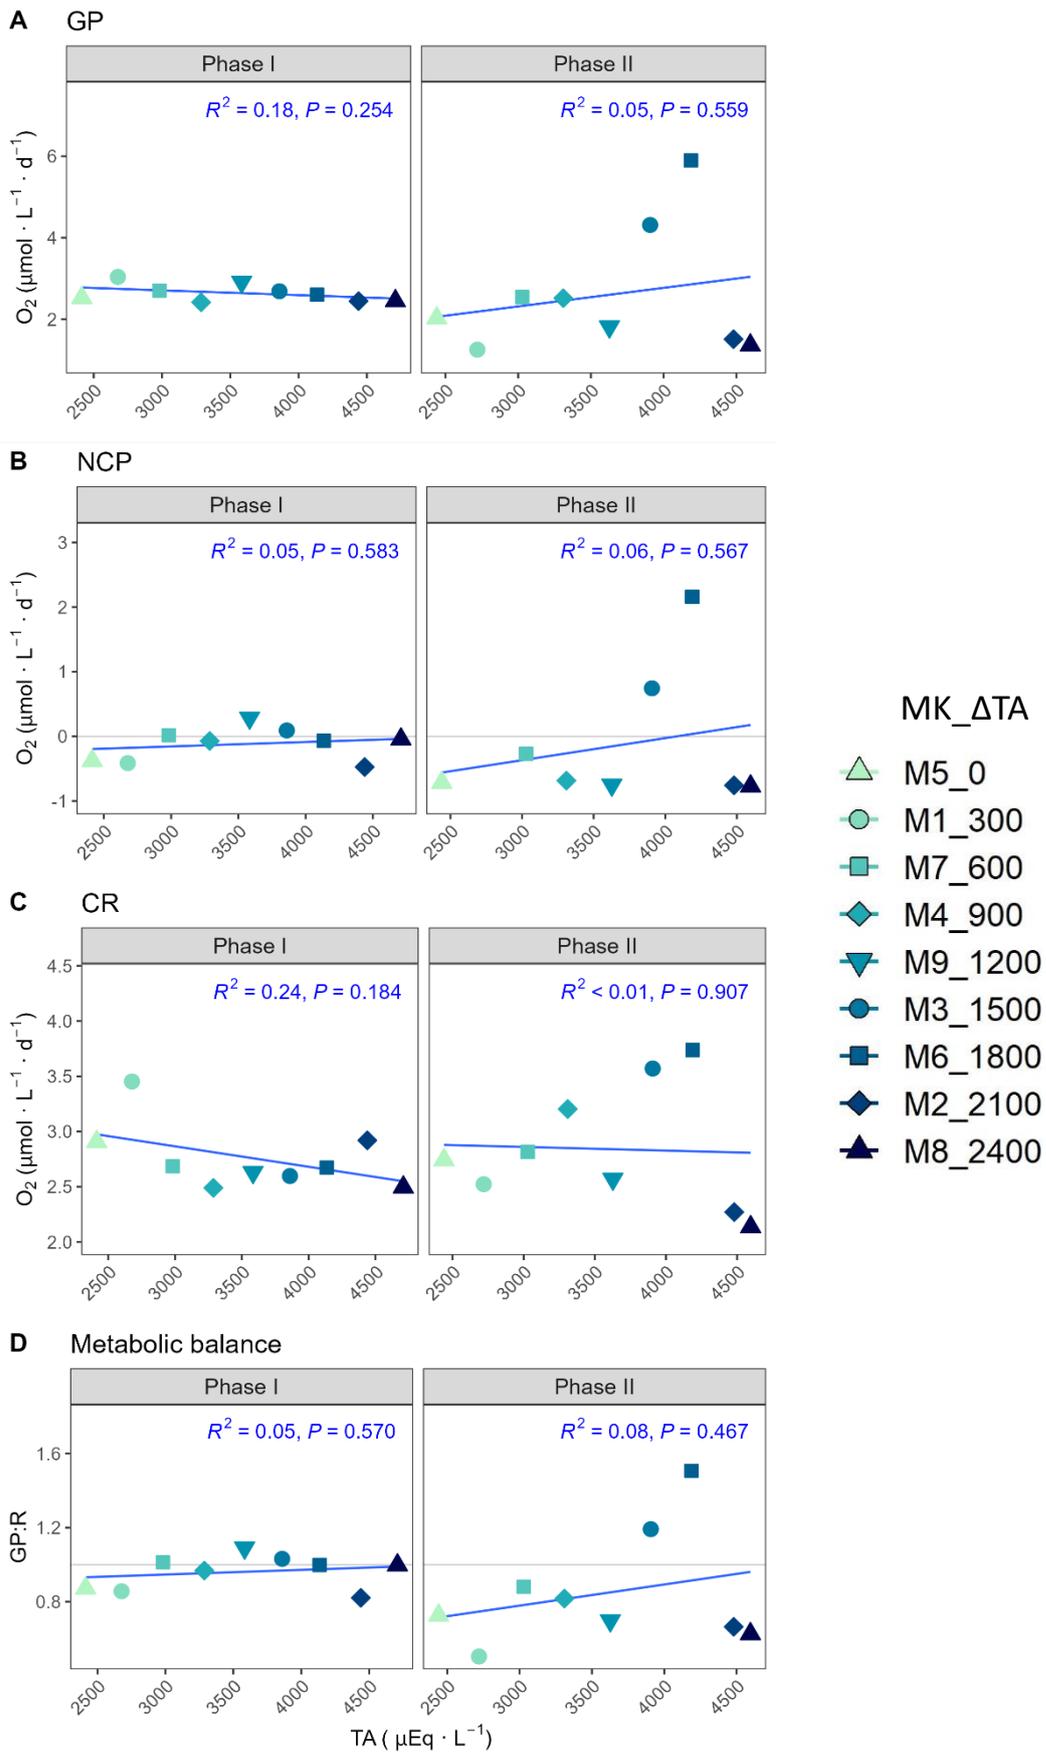

Figure S3. Phase-averaged linear regressions of A) Gross Production (GP), B) Net Community Production (NCP), C) Community Respiration (CR) and D) metabolic balance (GP:CR).

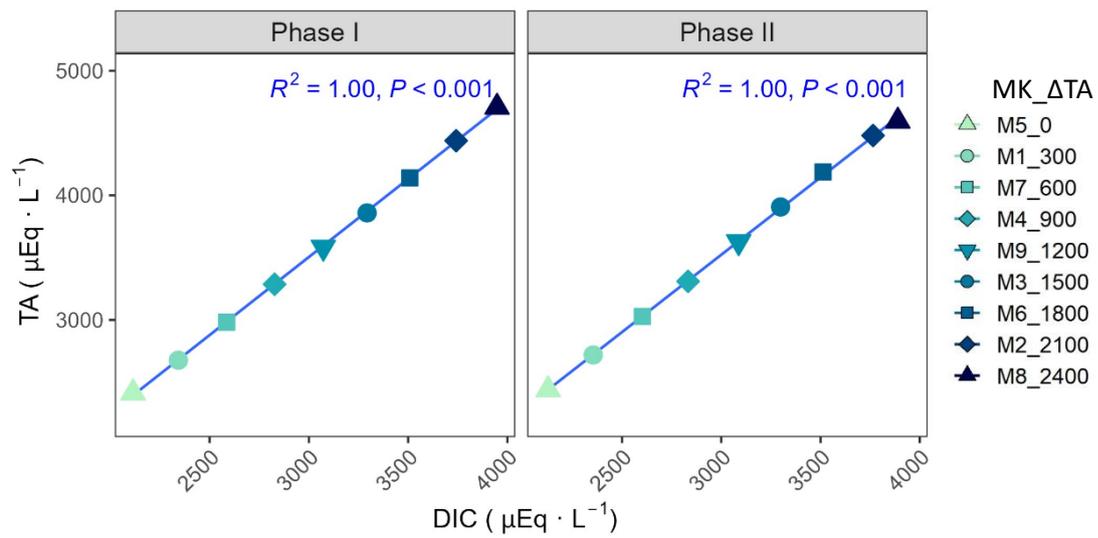

Figure S4. Linear regression between the post treatment averaged-out values for TA and DIC, obtained for each phase.

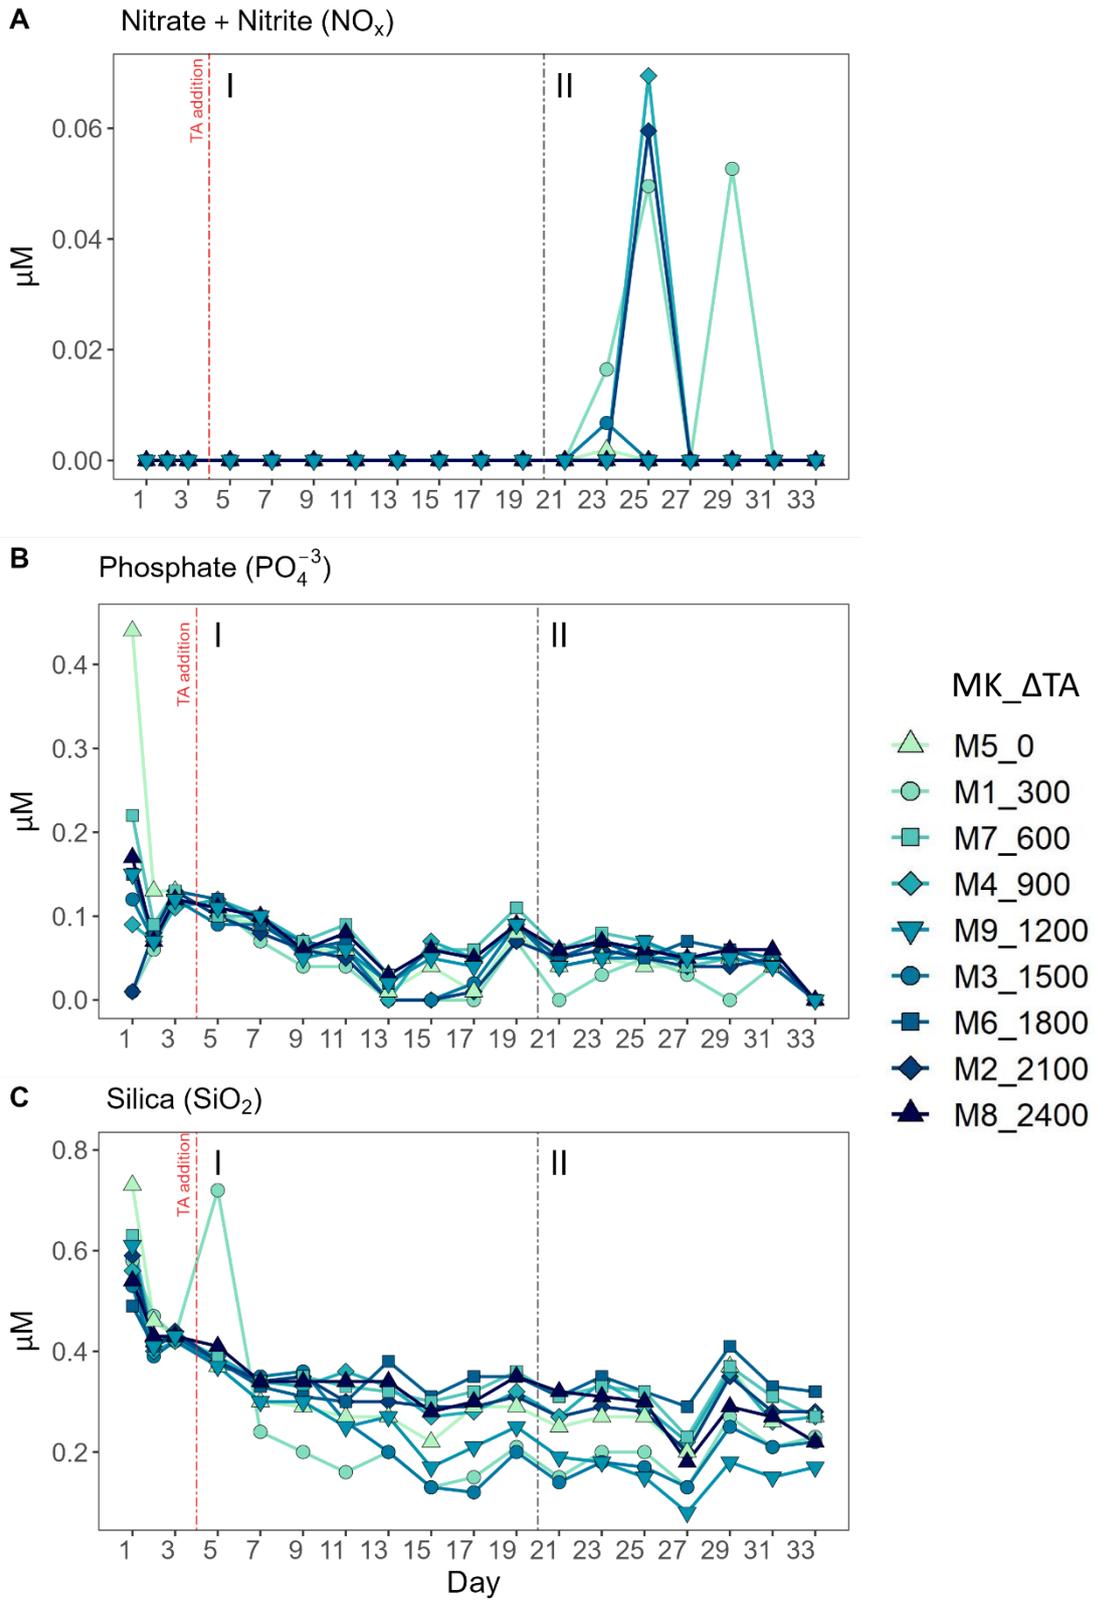

Figure S5. Temporal development of the A) nitrate+nitrite, B) phosphate and C) silica in situ concentrations.
