

Supplementary Information

Supplementary Table 1 Considered major drought events with pre-defined event regions and periods based on the cited references, serving as spatial and temporal bounds for the analysis. Events are ordered chronologically and grouped by seasonal and multi-year events. Note that the Europe 2022 event is only used to introduce the methodology for characterising the drought events, based on the near real-time products only.

Region	Year	Reference(s)	Start time	End time	Latitude extent	Longitude extent
