Supplementary Information of Koseki et al.

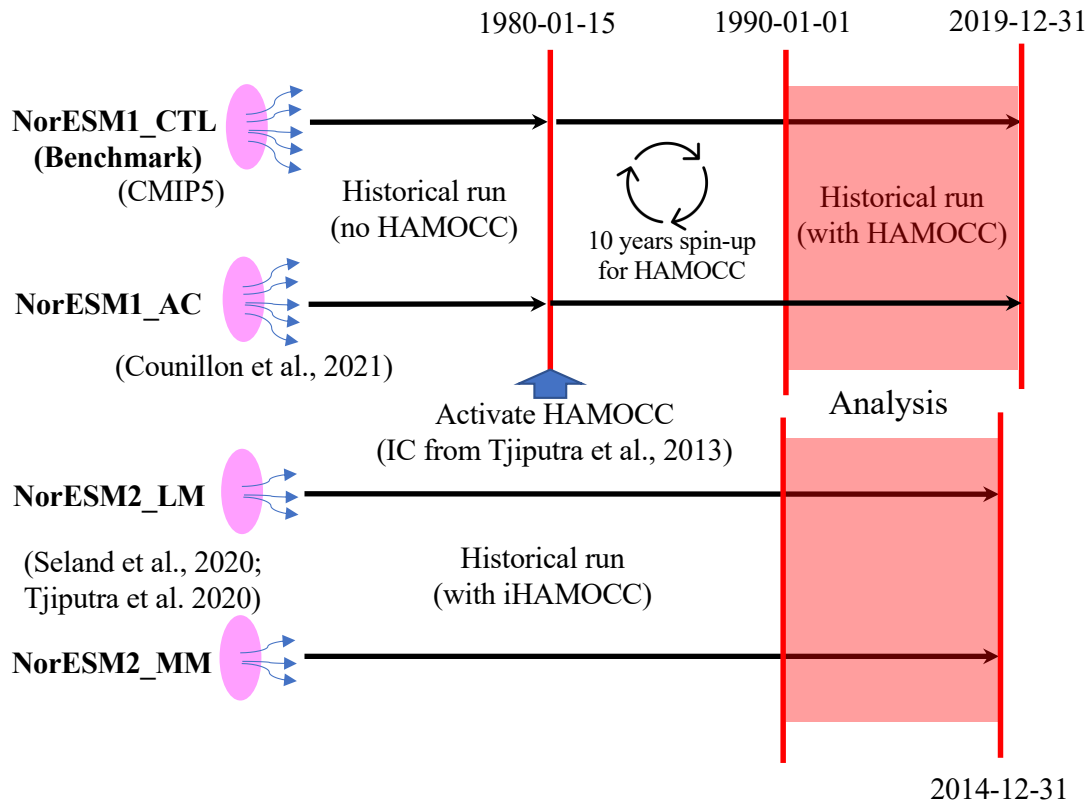
Here, we would like to have supplementary figures for Koseki et al. This information consists of 5 figures.


Figure S1. Schematic of experimental designs of NorESMs
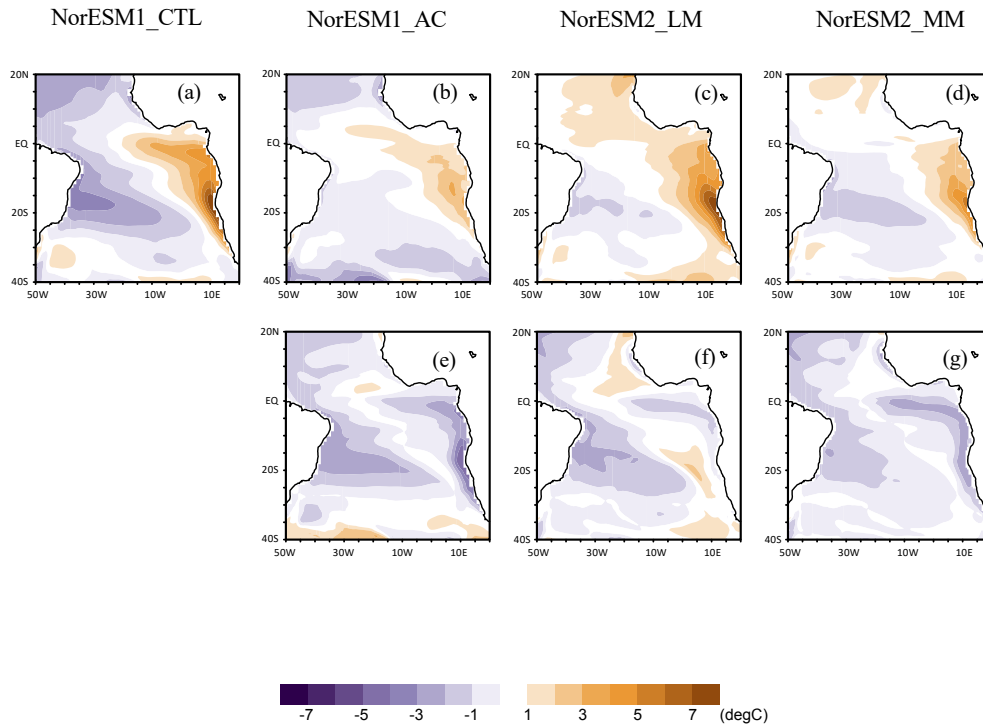

Figure S2
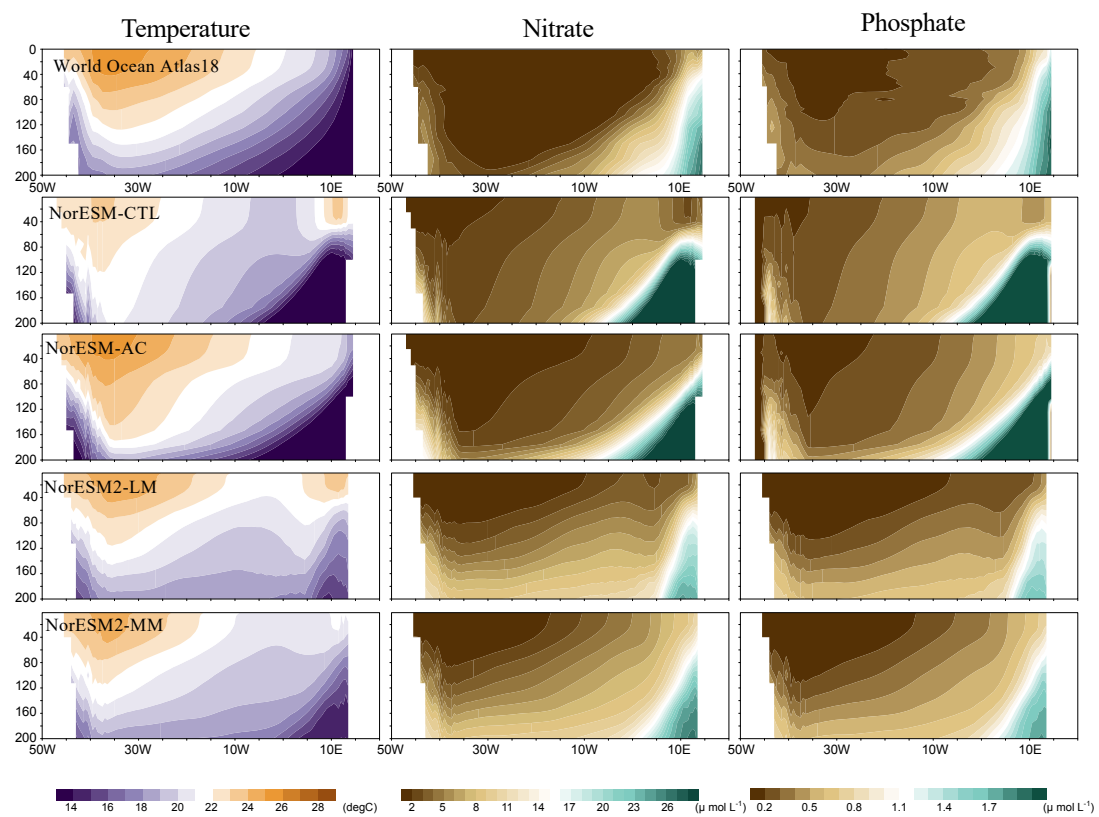
Same as Fig. 1, but for summer (June-July-August) climatology


Figure S3
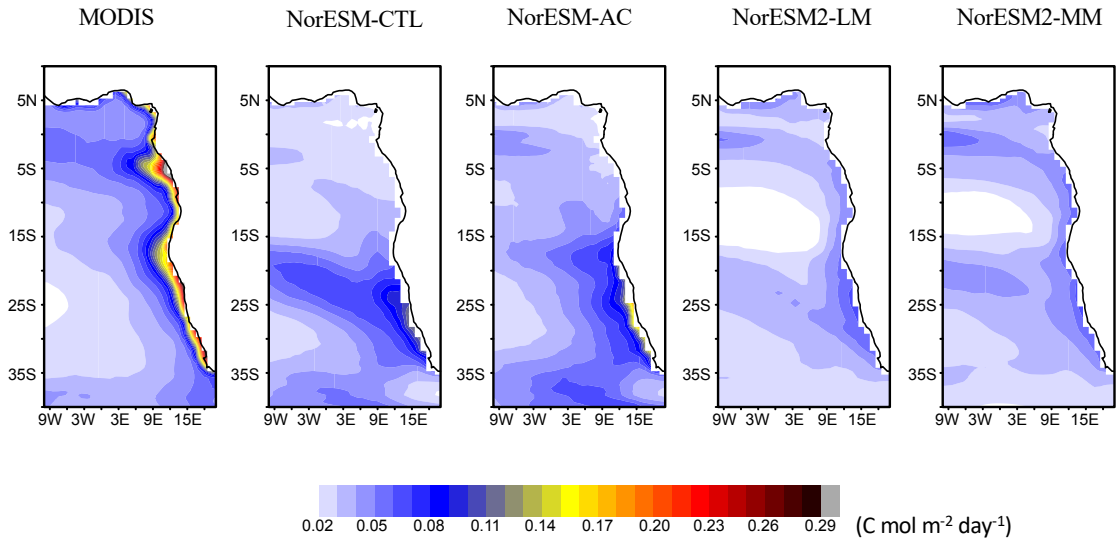
Depth-longitude section of annual-mean climatology for (left) temperature, (middle) nitrate, and (right) phosphate averaged 25°S and 18°S in observations and each NorESM simulation.


Figure S4

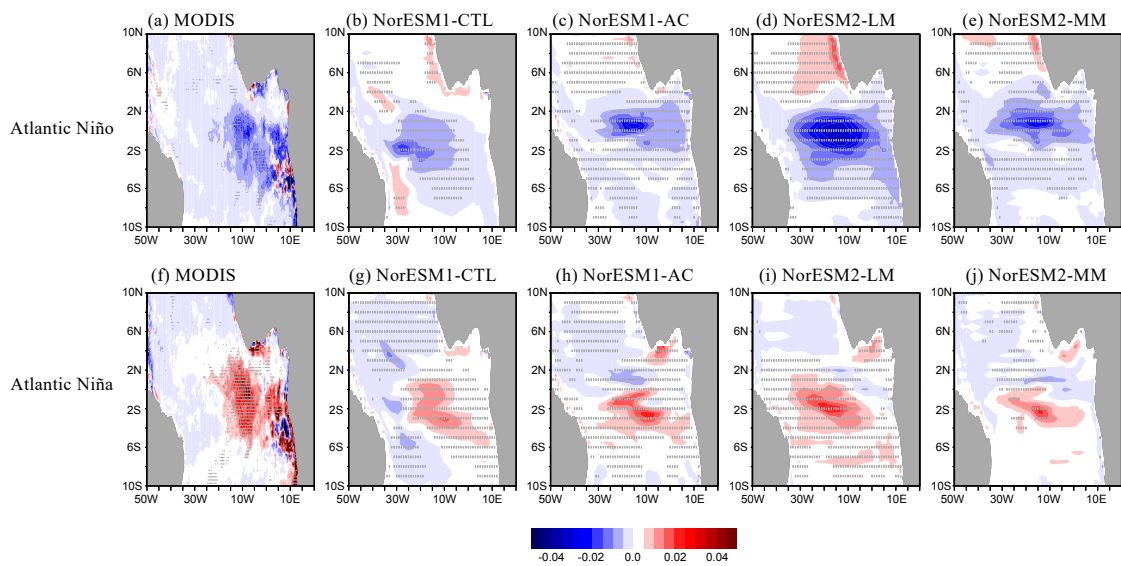
Annual-mean climatology for primary production in observations and each NorESM simulation.


Figure S5

Composite anomalies of primary production for observation and NorESM simulation for (top) Atlantic Niño and (bottom) Atlantic Niña in June-July, respectively.
