

Dear Lander and co-authors,

Thank you for your response to reviewer comments and for your extensive edits, which I am satisfied address the concerns of the reviewers. I am happy to accept this manuscript for publication in the Cryosphere, however would ask that you please first consider the minor suggestions listed below.

Kind regards and thanks again for your submission.

Caroline

1. Please check that the added radar profiles in Figure 2 are appropriate for colorblind readers.
2. In the title for section 3.3 I believe "ANUDEM" should be capitalized. It should also be introduced within the text of this section when discussing the Topo-Ro-Raster algorithm.

*Dear editor,*

*We greatly appreciate your positive recommendation for publication of our manuscript. We provided the latest version of the manuscript with the two minor revisions you suggested. We opted to use a blue colour scale.*

*Kind regards*

*Lander Van Tricht*
