

Dear Prof. Koji Suzuki

The last referee was delighted to find the significant improvements in your manuscript but still provided a few minor comments below:

There is a small mistake in line 194. I think the subplot cited in this sentence should be 4c. And there is a repetitive description of subsurface DeltaC and Fig. 4b in line 194 (it has been described in lines 191-192).

We greatly thank your handling and effort in our manuscript. We believe our manuscript is ready for acceptance.

We revised the pointed sentences (L194). We thank the comments very much.

Taketoshi Kodama
