

### **Editor's suggestions for minor technical revisions**

I would like to suggest some minor technical revisions, as follows

line 556: please simplify the sentence removing the two expressions of the ratio in the text and leaving the results of the operations ( $2.766 \times 10^{-2}$  and  $5.103 \times 10^{-1}$ )

Tables: verify number of decimal digits in tables

Table 6: "Range of values of" can be removed from column headers

**Response:** We have completed all of the above.
