Author's response:

Dear ACP editorial team,

thank you for accepting our manuscript "Contrasting extremely warm and long-lasting cold air anomalies in the North Atlantic sector of the Arctic during the HALO-(AC)³ campaign". As final changes, we have now also added the reference to the codes for the reproduction of the figures in the *Code and data availability* section. Could this manuscript please be added to the HALO-(AC)³ special issue (https://acp.copernicus.org/articles/special_issue1272.html)?

On behalf of all authors and with best regards,

Andreas Walbröl
