

Response to editor comments

Thanks to Arjen for very helpful comments for fine-tuning a few neglected odds and ends. We adopted all suggestions with the following exceptions:

- We did not add lat/long/north arrow/scale to Figure 1A (map space showing the entire Greenland island outline)
- In the last figure, figure 8, we did not say where specifically the photos were from in terms of adding a symbol on a prior map figure; instead, we wrote that the photos are from the field area, as we did with Figure 2.
- There is a panel C in Figure 5.

Thanks again,
All the best,
Jason Briner
