

Journal: Anales Geophysicae
Manuscript Number: egusphere-2023-977
Article Title: Polar Mesospheric Summer Echo (PMSE) Multilayer Properties During Solar Maximum and Solar Minimum
Authors: D. Jozwicki et al.

Referee Report

Based on my last review of this manuscript, I can only repeat that the authors have adequately considered the recommendations and suggested corrections that I made during the first review. In its current form, the manuscript is clearly readable and has provided new information on the topic under investigation. I therefore consider the manuscript in its current form to be suitable for publication.
