Supplementary material

Table 1. List of the nivometric stations rescued in this study. For each station, the membership National Hydrographic and Mareographic Service (NHMS) compartment, the latitude and the longitude (in decimal degrees), the altitude (in m a.s.l.) and the data availability (in %) for each snow indicator are reported. Note that data availability for Snow Cover Duration (SCD) and Number of Days with Snow (NDS) refers to the 1951-2001 period, whereas data availability for Height of New Snow (HN) is calculated over 1971-2001 period. The stations taken into account for the analysis are marked with an asterisk (*).

Station Name	NHMS Compartment	Latitude (° N)	Longitude (° E)	Altitude a.s.l. (m)	Data Availability (%)		
					SCD	NDS	HN
