

Dear Editor,

We note that the reviewers do not have any comments at this stage.

However in this reponse, we would like to draw your attention on a bug which has been found by an external user of TARTES after the acceptance of the paper. This bug concerns the actinic flux code and only affects, marginally, figure 14 of the paper (see the difference below). The equations and the text are not affected at all. We propose to upload the new figure.

We would like to thank you and the reviewers for handling and reviewer our paper.

Best regards  
Ghislain Picard & Quentin Libois
