

Technical comments on Ervens et al.

In general, I suggest making sure the references are listed correctly (I have a few points I noticed below). Also I suggest using “e.g.” consistently, perhaps always use “e.g.”?

- l. 428: remove ‘(’ in front of Schlosser
- l. 514 remove brackets enclosing 2024
- l. 636: write as C_5H_8
- l. 657: add citation for CAABA/MECCA ?
- l. 734: no brackets enclosing 2012
- l. 857: change to HO_2 (remove ‘sub’)
- l. 880: give full journal title
- l. 883: give full journal title
