Optimizing rock glaciers activity classification in South Tyrol (North-East Italy): integrating multisource data with statistical modelling

Chiara Crippa\*, Stefan Steger, Giovanni Cuozzo, Francesca Bearzot, Volkmar Mair, and Claudia Notarnicola

### **Editor comment:**

#### **Public justification (visible to the public if the article is accepted and published):**

Dear authors,

thank you for the careful reply and the revisions.

However, it seems that the track changes document does not show all changes. Hence, may I kindly ask to provide a documents where all changes made are highlighted. Moreover, it is sometime unclear from the response if anything in the manuscript was changed. I would at least expect to add a sentence or or few lines. Please clarify.

Once this done, I can make a decision.

#### **Authors' reply:**

*We apologize to the editor for the inconvenience. The manuscript was thoroughly reviewed and revised accordingly. We are now uploading the correct version of the manuscript with all tracked changes clearly visible.*

*Please refer to our previous detailed response, where we addressed each comment and indicated the corresponding updated sentences along with line numbers in the revised manuscript.*

*All previous comments have been fully addressed.*
