

Editor comment

Dear authors,

I am happy with the revised manuscript and so we can publish it in HESS. However, you need to change the author list as indicated "Please note that the sign "†" is usually used to mark up the deceased authors."

Best regards

Markus

Answer:

Thank you for your guidance regarding the use of symbols in the author list. To align with Copernicus Publications' conventions, I will replace the dagger symbol (†) with an asterisk (*) to denote the author's equal contribution.
