

Response to Co-editor comment

concerning the manuscript

Two different perspectives on heat waves within the Lagrangian framework

by A. Mayer and V. Wirth,

submitted to Weather and Climate Dynamics

Dear Co-editor,

Thank you for your two comments, which were both very valuable. We have corrected equations (11) and (15) and added a short paragraph (Lines 329 to 333) addressing the slope of the individual curves. We believe these changes contribute to the clarity of the paper.

Best regards,

Amelie Mayer
