Subsurface manifestation of Marine Heatwaves in the South West Indian Ocean

Response to Editor

Editor comment

The ROR database lists the institutions of the corresponding author but with a different cities than given in the manuscript. Please clarify whether the RORs "University of Cape Town (Rondebosch, South Africa)" and "South African Environmental Observation Network (Pretoria, South Africa)" are still correct.

Author Response

Please note that the RORs are still correct. The ROR database has the correct city for the University of Cape Town, which is “Rondebosch, Cape Town, South Africa”. The manuscript has been updated accordingly to include Rondebosch in the address. Whereas, for the South African Environmental Observation Network, the national office is located in ‘Pretoria, South Africa’, which is the address listed in the ROR database. However, we are located at a specific node of the South African Environmental Observation Network, which is the Egagasini Node, Cape Town, which is the referenced address in the manuscript.
