

Dear Dr. De Rydt,

We are now in the process of making all the Seakon model output used in this study available on the Federated Research Data Repository (FRDR). It will be available at <https://doi.org/10.20383/103.01249> once the files have been reviewed by the Data Repository managers. We have added information to the “Code and Data Availability” section on how to access the model output.

We would like to thank you for your work as an editor on this manuscript.

Sincerely,

Erica Lucas, Natalya Gomez, Terry Wilson
