A new characterization of the North Atlantic eddy-driven jet using 2-dimensional moment analysis - Supplementary Information

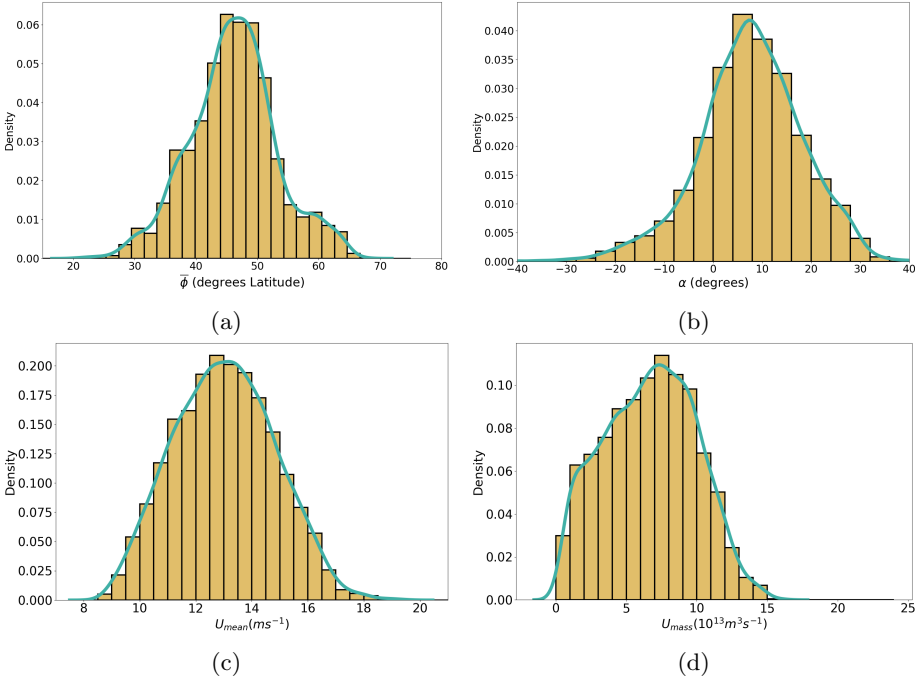
February 19, 2024


Figure S1: Distributions of (a) $\overline{\phi}$, (b) α, (c) U_{mean} and (d) U_{mass} which includes values on multiple objects days.
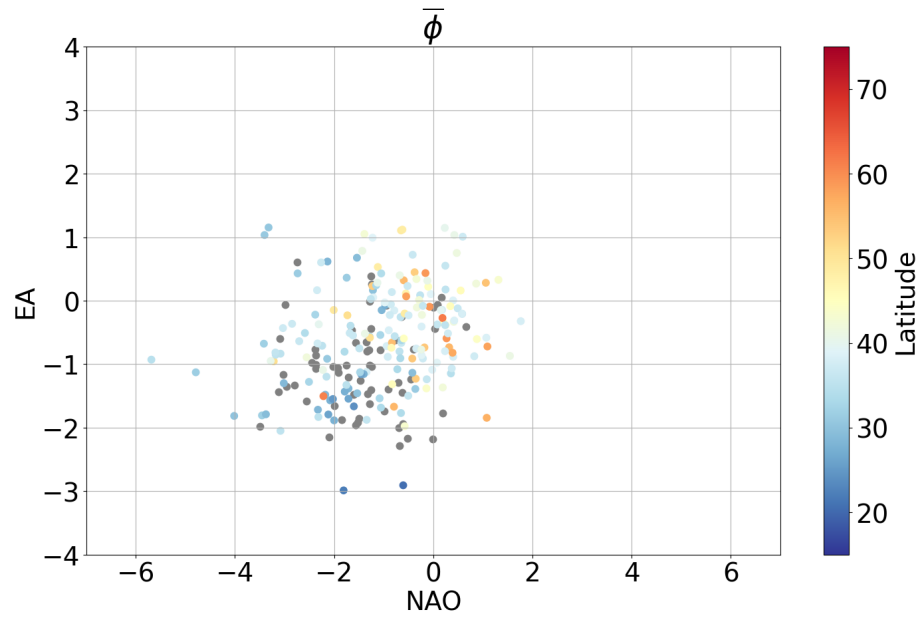

Figure S2: Scatter plot of days with zero or two objects defined. Points that are coloured by $\overline{\phi}$ represent days with two regions and grey points are days with no regions.
