

Dear editorial team,

We have modified the fontsize in figures 2, 3, 7 and 8 and added back the colorbar on figure 2.

We have modified the units on the second column of figure 5. We have replaced « No units » by « $(10y)^{-1}$ » as it represents decadal trends over the period 1985-2014 that are standardised by the climatological mean over the period 1995-2014. We also modified the legend of this figure relative to this change.

We have modified the units on figures 3, 5, 7 and 8 and the legend of these figures relative to these changes. We have replaced « $mm\ day^{-1}$ » by « $mm\ d^{-1}$ » and « day^{-1} » by « d^{-1} ».

Sincerely,

Julien Boé & Juliette Deman
