32 Note: EBF, CROP, and OP are short for evergreen broadleaf forests, croplands, and oil palm plantations, respectively.

**Table S3: The variables used to explain LAI variations using XGBoost model.**

Categories	Variables	Descriptions and Units	Sources
Land use types	f_EBF	Fraction of evergreen broadleaf forest in the grid cell (%)	see Methods
	f_OP	Fraction of oil palm in the grid cell (%)	
	f_CRO	Fraction of cropland in the grid cell (%)	
Climate variables	f_Other	Fraction of other land uses in the grid cell (%)	
	MAT	Mean annual temperature (°C)	
	MAP	Total annual precipitation (mm)	<a href="https://cds.climate.copernicus.eu/">https://cds.climate.copernicus.eu/</a>
	WS	Wind speed (m s <sup>-1</sup> )	
	RAD	Shortwave downward radiation (J m <sup>-2</sup> )	
Stand Ages	RH	Relatively humidity (%)	
	Age_EBF	Stand ages of evergreen broadleaf forests (year)	<a href="https://doi.org/10.17871/ForestAgeB_GI.2021">https://doi.org/10.17871/ForestAgeB_GI.2021</a>
	Age_OP	Stand ages of oil palms (year)	<a href="http://dare.iiasa.ac.at/85/">http://dare.iiasa.ac.at/85/</a>
CO <sub>2</sub> concentrations	CO2	Annual CO <sub>2</sub> concentrations (ppm)	<a href="https://gml.noaa.gov/dv/data/">https://gml.noaa.gov/dv/data/</a>
