

Report #1

We appreciate your review and comments on our manuscript, “Technical note: A fast and reproducible autosampler for direct vapor equilibration isotope measurements”. Your feedback is valuable to us and we will make the recommended minor revision accordingly.

The revision has addressed all comments. There is a minor formatting error in the abstract on line 14 and in the MS line 183 (several instances) - it's unclear regarding "bias" what the number means - for example, a bias of $-3.9e-15$ ‰ (??), which is nonsense. I suspect a formatting defect.

We changed this to a “ -3.9×10^{-15} ‰” format.
