

EGUSPHERE-2024-628

Dear editor,

I included the modifications suggested by the reviewers. The changes are listed in the referee comments and shown in the track-changes file.

However, one reviewer suggested that the figures should be shown within the text. Now, the result figures come after all the text for some reason. I think this is an issue with the Copernicus Overleaf template, and I possibly require editorial help with this, after I have submitted the LaTeX files.

Best regards,

Martti Honkanen
