Table of contents

Figure S1. Average magnitudes of OM-AOD (a.), Du-AOD (b.), and TCSO\$_2\$ (c.) concentration around the events. Different colors represent different anomalies. The shadowed region delimits the event.	2
Figure S2. OM-AOD, Du-AOD and TCSO2 time series and event periods for (a) BB-LRT, (b) Dust-LRT and (c) Volcanic-LRT along with chemical sampling days for the selected events.	2
Figure S3. PMF's Factor profiles for the models run for the set of sampling days for (a) BB aerosols, (b) dust and (c) volcanic aerosols.	4
Figure S4. Factor contribution for BB, dust, and volcanic emissions factors identified in the PMF models for BB-LRT, Dust-LRT, and Volcanic-LRT	5
Table S1. Average magnitudes in $\mu\text{g}/\text{m}^3$ of the concentration of PM2.5 and its chemical components during the study period and before, during and after the identified events of (a) BB aerosols, (b) dust and (c) volcanic aerosols. The components that increased according to surrounding magnitudes for each event were shadowed.	3

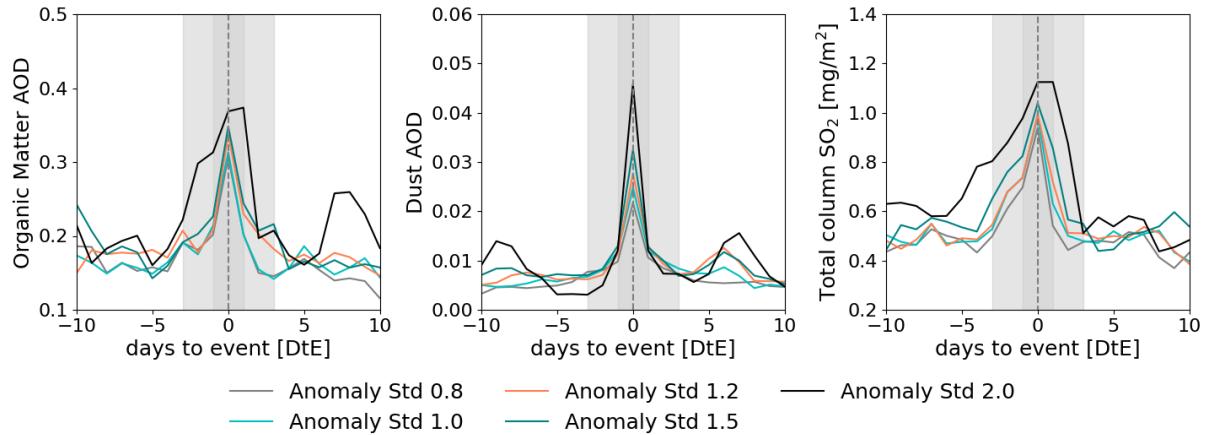

Figure S1. Average magnitudes of OM-AOD (a.), Du-AOD (b.), and TCSO₂ (c.) concentration around the events. Different colors represent different anomalies. The shadowed region delimits the event.

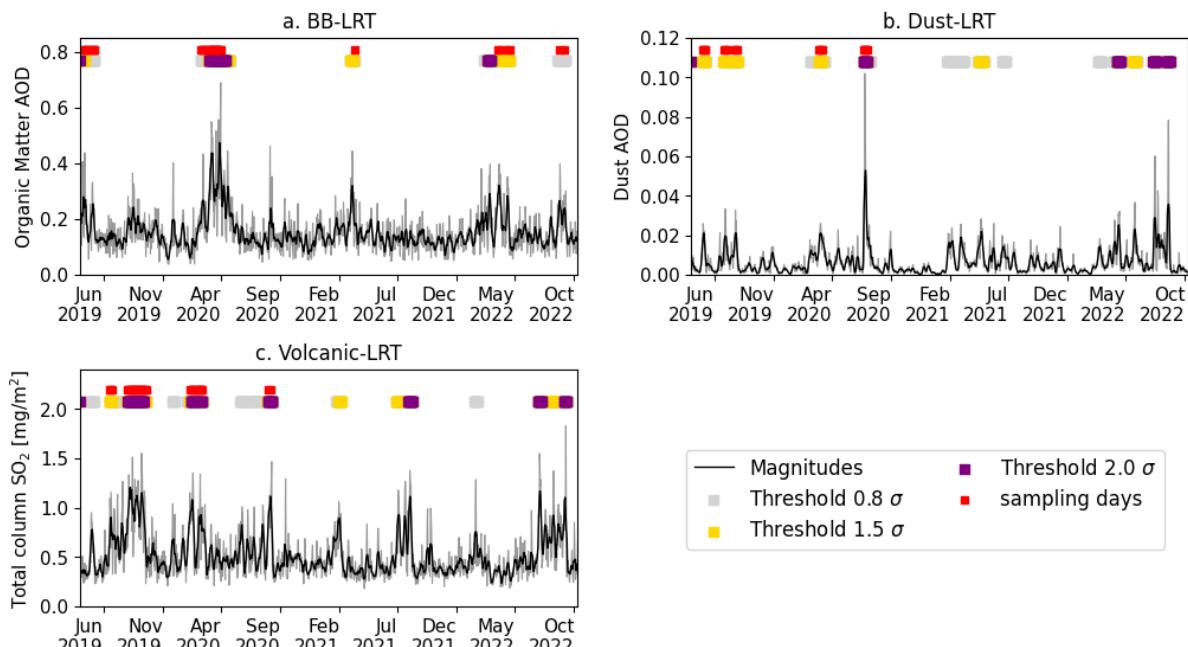

Figure S2. OM-AOD, Du-AOD and TCSO₂ time series and event periods for (a) BB-LRT, (b) Dust-LRT and (c) Volcanic-LRT along with chemical sampling days for the selected events.

Table S1. Median magnitudes in ng/m³ of the concentration of PM2.5 chemical compounds during the study period and during and around (before and after) the identified events of BB-LRT, Dust-LRT and Volcanic-LRT. The ratio OC/EC and SOC/OC are also included, these are dimensionless.

	Median	Median BB-LRT	Median Around BB-LRT	Median Dust-LRT	Median Around Dust-LRT	Median Volcanic-LRT	Median Around Volcanic-LRT
