

Response 19 november 2024.

Final reference in the introduction is still incorrectly formatted.

- We changed it.

Caption for Fig 7 is very brief

- We elaborated.

Delete or add reference to replace (?) in section 4.5

- There is no ? anymore

For figure 2(b), check if your figures containing maps/aerial images and photos require a copyright statement/image credit and add it to the figures (or captions). If these figures were entirely created by you, there is no need to add a copyright statement or credit. In that case it is important that you confirm this explicitly by email.

- We have gathered the first 6 pictures ourselves. The rest are credited to the correct sources.

Also, in future when compiling the tracked changes version please make sure that you have your 'old' and 'new' versions the right way round - the new changes were coming up as deletions in the uploaded file.

- I am sorry for this, but for some reason latexdiff throws error when doing it the other way around.
