

## **RESPONSE TO EDITOR**

**Dear Authors,**

**Thanks for significantly reducing the abstract as I suggested to you.**

**Before final acceptance, I would like to invite you to fix 2 little points.**

**1. Try to remove references in the abstract**

**2. Define all Abbreviation used (CO is not defined)**

**This seems important in my opinion, as abstract should stand alone and usually do not contain references.**

**Best**

**Authors:**

**Dear Editor,**

**Thank you again for your message and for your guidance throughout the review process.**

**Following your request, we have revised the abstract by removed references and define all abbreviation.**

**I also updated the equation 2 there was a mistake when I initially wrote it. Only the denominator has been changed.**

**Please find the updated abstract in the revised manuscript.**
