

Reply to the Editor of the manuscript “Decadal tropospheric ozone radiative forcing estimations with offline radiative modelling and IAGOS aircraft observations”, Sellitto et al., third review stage.

Dear Andreas,

I’m sorry, I did not check the length of the Abstract in the second iteration of the review of this manuscript. I have now modified it so that it has 250 words. I also added the Data Availability statement, as you suggested (thank you for the specific suggestion).

Thank you very much for your work during the review of our manuscript,
[Pasquale](#)
