Response to the editor's decision
Assessing the effect of forest management on above-ground carbon stock by remote sensing

Dear Mr Migliavacca,

We are delighted to hear that the revised manuscript has been well received. All proposed technical corrections were implemented, and the European Union's logo was removed from the 'Acknowledgements' section. Additionally, figures f04, f05, f06 and f08 were adapted, changing the units 'tons/ha' to 'tons ha^{-1}' in the axis titles.

We would like to thank you and the reviewers for the valuable suggestions and comments on the article, which greatly helped to improve its quality.

Best regards,

Sofie Van Winckel and co-authors
