(1) Data availability - Please add a statement concerning data availability in line with the data policy of Copernicus Publications: https://www.natural-hazards-and-earth-system-sciences.net/policies/data_policy.html - As far as I can tell, the rockfall catalogue has not been made available publicly or as a supplementary material. You have listed the sources and have shown these events in Figure 1 but the dataset itself is not included (showing further details, coordinates, date of event, etc.). Perhaps, this can be added as a table in the supplementary material.

(2) Your manuscript will benefit from further language editing and proofreading (e.g., lines 110-114, lines 239-241). Lines 621-626: This is a very long sentence and contains informal language (i.e., ...don't learn...). Please review the text to resolve grammatical issues and shorten very long sentences.

- Authors response

Thanks to the editor for the comments. We add paragraph "Data Availability" after the conclusion and we have modified the parts as you suggested.
