

Thank you for your positive decision. Figure A1 has been moved to below the Appendices (I think this is the issue? I've read the manuscript composition document but I'm still unsure!) and ENSO etc will be expanded out in the modified short summary after submitting this statement.

Four small additional changes have been made to the manuscript:

- two typological errors have been fixed
- a broken cross-reference from removal of the altitude dependence material has been removed
- Figure C1 has been replaced with the correct image - the previous version had a duplicate copy of main Figure 5, the error arising because they look visually similar and also have very similar filenames locally.
